20140417 Response to EPA re Schedule and Sampling Events.pdf

Jennifer,

Attached is our reply to EPA Region 2's April 16 letter.

Confirming what I reported earlier today, active layer thickness in the areas of Panels N37, N38 and N39 will be measured at 9 AM tomorrow morning (April 18). This will be followed by the placement of two additional fabric panels with accompanying armor stone starting around 10 AM. The work crew will then take off for the holiday weekend and resume armoring activities on Monday April 21.

Stan,

Please see attached letter regarding daily schedule updates and notification of sampling activities.

This is the letter I mentioned I would be sending over today on our earlier status call.

Please let me know if you would like to discuss further.

Thanks in advance,

Jennifer LaPoma
